***How does Best Lights Win Lighting Projects?
By having a superior way to create a positive environment!***

The Roeper School in Bloomfield Hills, Michigan requested from the electrical contractors that were bidding the project, a better way to light the two court basketball and volleyball gym. They wanted the best playing facility for their students.

Six years prior to this project Mike Conshafter from Advantage Electric saw a 250,000 sq. ft. sport facility that was lit with Indirect Best Lights. He made his proposal using the same fixture (Best Lights 1000 Watt MH-ISP Pulse Start) and won the project.

The results from using Best Lights:

1. Even light levels everywhere.
2. No shadows or Glow Bomb Glare.
3. Electrician installs half the fixtures.
4. Half the maintenance and lamp replacement over high bays.
5. Everyone agrees the quality of lighting is far superior than anything they have seen.

Best Lights manufactures the most energy efficient Patented Indirect HID fixtures in the world.

Patented Light Fixture

Indirect Sport Pendant (ISP)

with HID remote ballast

The ISP lights the facility evenly from ceiling to floor, eliminates annoying glares, shadows, and creates a spectacular playing environment. This durable fixture and unique patented design reflects light at specific angles increasing illumination on the playing surface. Ideal for lighting basketball, tennis, volleyball, soccer, and hockey facilities with white ceiling heights from 15-50 feet.

Description: Metal Halide indirect base down bulb fixture pre-wired and assembled. Aluminum 24" outer housing with suspended impact resistant inner aluminum reflector. Internal metal tubing wire raceways. Fixture painted: high temperature polyester powder coating; gloss white. Wire guard, pendant, 4" swivel ball box cover included.
