## *Massillon High School Field House!*

### *Why use Indirect Lighting in a large sports facility?*

The Paul & Carol David Foundation donated a new field house to the Massillon High School in Massillon, Ohio. They are winners of 22 State Championships and wanted the latest technology in lighting along with keeping their players safe. Best Lights, Inc. supplied the 1000 watt Pulse Start MH-ISP. Illuminating the facility indirectly eliminated shadows and glare while delivering perfectly even light everywhere in the building. Best Lights are designed to take a hit from balls and protect the lamp within its suspended inner housing, protecting the players from broken glass falling on the field.

Experts in lighting facilities indirectly with our energy efficient fixture design gives our clients perfectly lit facilities.
