MH-IBU
Indirect Pool

*Uncovering the Myth about Asymmetrical Lighting in Pools!
Out performing the competition in reflector design & light output.*

BEST Lights was asked by the Michigan Athletic Club to find a way to increase the light levels in their pool. "We only had 5 foot candles in the middle of the pool with new lamps in the 400 watt wall pack fixtures. It was a dark place to be." said Tim Weirauch. So the team of experts at BEST Lights went to work, we suggested to replace fixture for fixture with our 400 watt MH-IBU. The M.A.C agreed to do a test with 2 fixtures and were so impressed with the light output they completed the rest of the job. "We have 5 times the light using the same wattage" says Tim Weirauch.

BEST Lights manufactures the most energy saving HID light fixtures in the world. Knowing how to reflect light is the difference that saves our clients millions of dollars on their electric bills. BEST Lights come with a industry leading 5-Year warranty.

Results:

- ◆ Increase in light levels from 5 to 25 foot-candles in the center of the pool using the same wattage.
- ◆ Remote ballasts were installed in the maintenance room for easy access.
- ◆ Employees and members say that BEST Lights make all the difference in the pool atmosphere.
