

# Indirect Wall/Pole Mount with HID Remote Ballast

The (IW/P) Indirect Wall/Pole Mount fixture provides up to 35% more light than other fixtures because of the unique reflector design and mounting positions. This durable fixture reflects light at specific angles increasing illumination at floor levels. More light can allow fewer fixtures to be used resulting in lower electric bills and installation cost. Ideal for lighting sports, pools, commercial, fabric structure and air structure facilities with white ceiling heights from 15' to 80'. The mounting bracket allows perfect aiming for maximum reflection and the inter-locking system secures the fixture in-place. Ideal for retrofitting existing pole and wall mount fixtures.

**Description:** Metal Halide indirect universal bulb fixture pre-wired and assembled. Aluminum 24" outer housing with suspended impact resistant inner aluminum reflector. Internal and external locking bolt system on bracket and fixture. Fixture Painted: high temperature polyester powder coating; 90% gloss white. Wire guard or glass lens. Male and female auto lock plugs are available for quick connection at fixture.

## Ordering Information

example: MH-IW/P 1000 MT P 277 LI

MH-IW/P	Wattage	Item Number	Remote Ballast Options	Voltage	Lamp Included	Other Options:
