MGA Research*; 20,000 sq. ft. with 27' ceiling;
21-1000Watt MH-IBU; 70 FC 1.05 watt per sq. ft.

The patented design of Best Lights Metal Halide indirect light fixtures provides brighter, more uniform lighting. Annoying shadows and glare are eliminated for perfectly illuminated working environments.

Best Lights fixtures are so energy efficient that fewer fixtures are needed. Installation costs are lowered and energy consumption is reduced.

What users of Best Lights MH-IBU & MH-DIA fixtures say:

"Working under Indirect Best Lights has had a positive effect on employee morale and productivity. There are no shadows making it easier to see our work and there's no light glaring in our eyes."

100 PARK STREET TROY, MI 48083
