

Bright Ideas

from

MH-ISU
MH-DIR

No building is too big for indirect lighting!

There is nothing worse than having hundreds of direct light fixtures glaring in your eyes during practice. That is why the University of Louisville went with BEST Lights to light 75% of the project indirectly. The indoor field house is 205' wide x 410' long with a 33' eave and a 69' ridge. We used 98-1000 watt MH-ISU (Indirect Sport Unistrut) and 35-1000 watt MH-DIR (Direct). Even lighting with minimal glare.

BEST Lights manufactures the most energy saving HID light fixtures in the world. Knowing how to reflect light is the difference that saves our clients millions of dollars on their electric bills. BEST Lights come with a industry leading 5-Year warranty.
